[REDACTED]

We do not have any mapping or documents showing if or where the catch basin/storm drains are connected for the Holliday Inn. What I can tell you is if the catch basins are connected to our storm sewer system in that vicinity, then they would go to the river without any treatment. We do have combined sanitary & storm sewer that runs adjacent to the Holliday Inn, however It is highly unlikely that they would have connected to it unless the connection was illegal.

The only place that we know of that might possibly have plans showing the Holliday Inn storm sewer piping would be at the City's Inspection Services Department. Which I believe I gave you contact information for earlier. If not, please let me know.

Rick,

Thanks again for the maps. I just need to confirm some information regarding the storm sewers/drains in the parking lot of the Holiday Inn. Do these drain directly to the Chemung River or are they sent to a POTW first?

Thanks,

██████████,

Ok, so I made a pdf of our GIS data overlaid on the 2006 ortho-photo. In addition, I found a few other sheets that will give more detail to our GIS mapping. Together they should give you all of the sanitary and storm information that we currently maintain. Hopefully the pdf should have layers that can be turned on and off, which will provide you with the option to zoom into the utilities without the ortho-photo displayed. If for some reason it did not come out that way, contact me and I will send you another pdf minus the ortho-photo.
